Projects

Social Media App

- **MERN** stack web application where you can post your thoughts which enables you like/unlike post and follow/unfollow people of your interest.
- Online platform allows you to create a public account and interact with other people.
- Mounted the app using **React and Express**, managed the data with **MongoDB**.
- GitHub - <https://github.com/ANGUSHYLESH/media-app>

Cloud Kitchen

- Allows you to pick your favorite food and get them on your table in a jiffy.
- Offers personalized recommendations, and has one of the best shopping-list features too.
- Mounted the app using **React**, managed data with **Firebase** and designed UI with **Tailwind**.
- GitHub - https://github.com/ANGUSHYLESH/Food_Order

Expense Tracker

- Real time web application that keeps note of your expenditure and helps you analyze your wallet.
- Uses **Speechly** to mark your expenses using voice commands on the go.
- Built using **React** and styled with **Material UI**.
- GitHub - <https://github.com/ANGUSHYLESH/expense-tracker>
